Trade Facilitation through the Single Window

There are specific goods that, upon importation and exportation, require the collaboration of Customs and other government agencies (OGAs). These goods may require licences and permits by OGAs as well as inspection by officers of the competent authority.

ASYCUDA World makes it easier for traders to apply to OGAs for stipulated licences and permits via its online portal. Through a single-window facility, ASYCUDA World gives you immediate online access to all relevant agencies to which you may submit all applications for certificates and permits.

This facility significantly lessens the paperwork and gives the trader immediate access to ascertain the status of applications or of certificates and permits which have already been granted.

The single-window can be accessed from a desktop or from a personal smart device. This assures fairness and transparency with less delays throughout the import or export process.

Your Customs and Excise Department is always willing and able to assist you and your business in its readiness to maximize the usage of this trade facilitation tool.

Please feel free to contact us.
