**NB.**

- Wefts consists of man-made fibers dyed in the mass, folded in two to form tufts which are bound together, at the folded ends, by a machine-made plait of textile yarns approximately 2mm wide. These “wefts” have the appearance of a fringe in the length.
- The heading **H.S. 67.03** also includes wool, other animal hair (e.g., the hair of the yak, angora or Tibetan goat) and other textile materials (e.g., man-made fibers), prepared for use in making wigs and the like or doll’s hair
- Carnival articles, generally of inferior material and finish (**H.S. heading 95.05**).
